Phylum Arthropoda

These are just a few pictures of the Phylum Arthropoda.

What is in Phylum Arthropoda

In Phylum Arthropoda there are four classes which are Class Arachnida, Class Diplopoda, Class Chilopoda and Class Insecta. The first class that we did research on was the Class of Arachnida which was on Spiders. The info showed where they lived and what they eat and also personal characteristics. The next class was Class Diplopoda which are Millipedes. The next class is the Class Chilopoda which was on Centipedes. Then there is the last group which is the Class of Insecta and in this group there are these Orders Isoptera, Order Orthoptera, Order Coleopteraer, Order Diptera, Order Hymenoptera, Order Lepidoptera and Order Siphonaptera. For more info click on any of the classes or any of the orders.

- * Class Arachnida
- * Class Diplopoda & Chilopoda
- * Class Insecta
